**GAS
TURBINE**

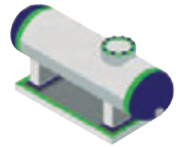

**DIESEL
GENERATOR**

NexxtGen's assets are its dedicated people, whom are professionals spanning an entire career in the field of power generation and fuel system. We pride ourselves to provide invaluable experience and knowledge gained in the management of mega projects to our clients. Our expertise in generator and fuel system are across different verticals such as Data Centres, Hospitals, Commercial, Government infrastructures and etc.

Talk to us on your requirements whether it's for a tender exercise, fit-out works, turnkey or design and build projects, we will be glad to provide you with our proposal and offer.

Our Core Specialisation

Both indoor or outdoor turbine generator and diesel generator system

Acoustic/weather proof enclosures, fuel storage bulk tanks and fuel distribution

Technicians for preventive maintenance of generator and fuel system

Exhaust chimney of Stainless Steel 304/304L or 316/316L double walled generator exhaust stack build and manufactured in the EU

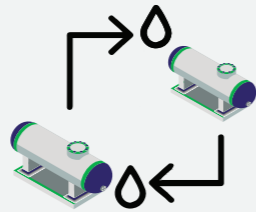

Design & installation

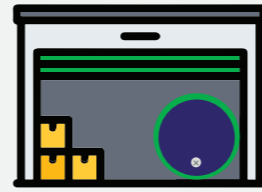

Industrial gas

Diesel powered generators

Fuel transfer

Storage systems

We can assist with the local authority requirements for generator systems, fuel system and fuel storage licensing. We can also provide project management and advice on design, manufacturing, delivery and hoisting of equipment on site, installation and commissioning of the generator and fuel system that we supplied.

Our team have more than 20 years of experience in generator systems and the fuel storage and distribution system for generator sets.

We collaborate with professional engineers, consultants and owners in the fuel system and generator system designs to comply with local code and/or Uptime Institute mainly for data centres and other industries.

WE CRAFT ELEGANT SOLUTIONS WITH POWERFUL KNOWLEDGE AND EXPERIENCE

System integrator for Niigata gas turbine generator & major brands of diesel powered generators

Niigata Gas Turbine

We are specialist integrator of:

- Niigata Power Systems – Gas Turbine Generator (GTG). Niigata gas turbine generator uses renewable diesel.
- This gas turbine generator is First of its kind to be supplied in Singapore with power rating up to a maximum 6500kVA. It's green, eco friendly & space saving.

Diesel Generator

- Nexxt Gen package major engine brands. E.g. Caterpillar & MTU up to 3,000kw
- Generators are assembled in a 2hrs/4hrs fire-rated enclosures fully fabricated in our yard, tested & delivered to site.

All Products

Bulk Diesel Storage Tank (Double Wall FRP)
Capacity: 4,000 litres to 130,000 litres

Double Wall Stainless Steel 304/316 Exhaust Flue Pipes
Dimension: 100mm to 650mm internal diameter

Acoustic Outdoor Generator Enclosures

Double Walled Stainless Steel 304/304L or 316/316L Generator Exhaust Stacks

Fuel Transfer System

Gas Turbine Generator
